PROFESSIONAL SUMMARY

Full Stack Software Engineer with 4+ years of experience building scalable web and mobile applications in fintech and enterprise environments. Strong expertise in React, Next.js, React Native, Node.js, TypeScript, REST APIs and microservices architecture. Experienced working with international clients and cross-functional teams, including remote collaboration with a U.S.-based professional soccer organization. Currently expanding into Data Engineering, working with Power BI, AWS, Hive, Grafana and data ingestion pipelines. Builds AI-powered features end to end — from LLM-driven natural language parsing to agentic development workflows with Claude Code — as a core part of daily engineering practice, not an add-on. Proven track record delivering production-ready software in agile environments. Focused on clean code, system reliability and measurable results.

TECHNICAL SKILLS

Frontend: React, Next.js, React Native, TypeScript, JavaScript, Redux, Styled Components, Tailwind CSS

Backend: Node.js, NestJS, Express, .NET, C#

Databases: PostgreSQL, MongoDB, Oracle, Redis, Supabase, Hive

Data Engineering & BI: Power BI, Data Ingestion Pipelines, AWS, Grafana, Hive

AI & LLM Engineering: Claude Code (agentic development workflows, multi-project CLAUDE.md context patterns), Google Gemini API, LLM-driven natural language parsing (text & audio), prompt engineering, structured output validation (Zod)

Architecture: Microservices, Microfrontends, RESTful APIs, SaaS platforms

DevOps & Cloud: GitLab CI/CD, SonarQube, OpenShift, Docker, Vercel, AWS

CMS & Integrations: WordPress (VIP/SportsEngine multisite), PayPal Orders API v2, Resend, Upstash Redis, Meta Conversions API

Testing & Monitoring: Jest, Dynatrace, Grafana

Methodologies: Agile (Scrum), Jira

PROFESSIONAL EXPERIENCE

Full Stack Developer

Santander Tecnología Argentina | Mar 2023 – Present

- Develop and maintain investment platform features actively used by real clients in a high-availability fintech environment.
- Design and implement scalable REST APIs using Node.js, NestJS and TypeScript.
- Work with PostgreSQL, MongoDB and Oracle databases in production systems.
- Contribute to microservices and microfrontend architectures serving thousands of users.
- Implement and maintain CI/CD pipelines using GitLab CI and SonarQube for code quality control.
- Deploy and manage applications in OpenShift cloud-native environments.
- Monitor system performance with Dynatrace and ensure quality through unit and integration testing with Jest.
- Currently transitioning into a Data Engineering scope within the team: building data ingestion pipelines, working with Hive and AWS for data storage and processing, creating dashboards and reports with Power BI, and monitoring with Grafana.

Website Manager & Full Stack Developer

Port St. Lucie SC – USL League One (Florida, USA) | Jun 2025 – Present

- Freelance engagement with a professional U.S. soccer club competing in USL League One, with all collaboration conducted in English.
- Manage and develop the club's website on a WordPress VIP/SportsEngine multisite platform.
- Built a full tournament registration system using Next.js, Supabase, PayPal Orders API v2 and Resend with PDF email attachments.
- Implemented Upstash Redis for rate limiting and Meta Conversions API for conversion tracking.
- Built the club's e-commerce store (store.portstluciesc.com) integrating a third-party product/order API, with passwordless email-code authentication, server-side payment processing and Redis-backed rate limiting across a Next.js frontend and a Railway-hosted backend service.

- Coordinate directly with the club's internal team and USL's technology department, attending meetings and producing documentation in English.
- Run email marketing campaigns via ActiveCampaign and resolved GA4 tag conflicts to set up the club's analytics property.

Frontend & Backend Developer
Implementaciones Industriales SRL | Aug 2021 – Mar 2023

- Built SPA applications using React.js, Hooks and Redux for internal business management tools.
- Integrated third-party REST APIs using Axios and developed backend services with .NET and C#.
- Managed SQL databases and optimized complex queries to improve application performance.
- Collaborated in debugging, testing and staging deployments in a cross-functional team.

Freelance Full Stack Developer
Independent | 2021 – Present

- Developed responsive websites and mobile applications using React, Next.js and React Native for clients across different industries.
- Built a SaaS court-booking platform for sports venues in Argentina/LATAM using Next.js, Supabase and multi-tenant architecture.
- Developed custom stock management and booking platform systems integrated with third-party REST APIs.
- Managed application state using Redux and Context API; delivered scalable, production-ready solutions tailored to client needs.

Accounting Assistant
Estudio Contable Tozzi & Ferre-Rivas | 2016 – 2021

- Assisted in financial documentation, tax reporting and regulatory compliance (AFIP, AGIP, ARBA).
- Generated financial reports and contributed to documentation digitalization and internal process optimization.

PERSONAL PROJECTS

Fecalpo — AI-Powered Expense & Shopping List Bot
Personal project | 2026

- Built a zero-cost WhatsApp bot that parses shared household expenses and shopping lists from free-form text or voice messages.
- Integrated the Google Gemini API to turn natural language (text and transcribed audio) into structured, validated data (Zod schemas), with regex shortcuts for common intents to minimize LLM calls.
- Designed for resilience on a free-tier LLM plan: automatic retries with backoff and a fallback model when the primary model is rate-limited.
- Stack: Next.js (App Router), Supabase, WhatsApp Cloud API, Google Gemini API, deployed on Vercel.

EDUCATION

Systems Analyst – Universidad Abierta Interamericana (2019 – 2022)

High School – Economics Orientation

LANGUAGES

Spanish: Native

English: Professional working proficiency – active daily use in meetings, written communication and technical documentation with U.S.-based clients and stakeholders. Currently taking private lessons to reinforce fluency (since 2026) — completed A1 level.
